Transportation System Plan Update

www.ashlandtsp.com

Public Workshop #3 March 9, 2011

Documentation Available on the Web

The Alternatives Analysis for the Ashland Transportation System Plan (TSP) Update has been done through a series of White Papers on all of the topics the City of Ashland wants to explore through this process.

Copies of the White Papers are available on the project website at www.ashlandtsp.com under the "Draft Documents" section of the website.

They are arranged by the meeting dates at which each of the papers was discussed at a joint meeting of the Ashland Planning Commission and Transportation Commission. Two groups of White Papers have yet to be presented to the Commissions. They will be presented on March 10th and March 17th and available on the website prior to the meetings.

Railroad Crossings Road Diet and Streetscape Patios Offset Intersections Bicycle and Pedestrian Innovations Roundabouts Bike Route Connectivity and Bike Boulevards Shared Streets Green Street Standards Funding Programs Transit/Rapid Transit Will Dodge Way - Alley Treatments Multiuse Trails Safe Routes to School Passenger Rail/Commuter Rail Downtown Access Plan Streetcar High Density Housing Access Management Plan Intersection Safety Treatments Freight / Airport Special Transportation Areas Alternative Approaches to Mobility Standards and Development Review Addition of an I-5 Exit	White Paper Topic	Joint Planning Commission/ Transportation Commission Presentations
